ABOUT SEAMAP PROJECT

The SEAMAP project addresses the need for cooperation between VET and the world of work in the maritime sector by introducing systematic approaches to and opportunities for VET and the maritime sector, fostering integration of maritime working life into maritime institution-based VET and enhancing the entrepreneurial skills of the people dealing with the maritime issues. This will be achieved by the promotion of more work related activities in the intended VET programmes, including the innovative models of work placement (work experience, work shadowing, work-based learning and apprenticeships).

The project team will identify and map available maritime jobs / placements and business start-up both at sea and ashore in partner countries. The main benefits of the project are to improve the attractiveness of the maritime industry, to provide increased mobility across, to foster the career guidance, to enhance the placement opportunities and to develop the entrepreneurial competences of the people at maritime and VET sectors.

IMPRESSUM

The project titled as “Searching the Extensive Application at Maritime Protocol – SEAMAP (Project Ref. No: 2017-1-TR01-KA202-045799)” approved by Turkish National Agency (www.ua.gov.tr) and funded by European Commission under the framework of Erasmus+ KA2 Strategic Partnerships for VET as a Development of Innovation is coordinated by Lucent Maritime (www.lucentmaritime.com), a subsidiary of LAM Lyonel A. Makzume group of companies. Lucent Maritime is the first MLC certified company operating crewing services based in Istanbul - Turkey, dealing with providing Crew Management and Ship Services to international ship-owners.
